

# Progressive and Linked Progressive e-Instant FAQ

## Progressive Jackpot e-Instant

### **What is a progressive jackpot game?**

A progressive jackpot e-Instant game is a game where a percentage of all bets from one game contribute to a jackpot that continues to grow with each bet. The jackpot amount starts at a base value and grows based on the amount of bets placed in the game.

### **How does the jackpot amount grow?**

For progressive games, a percentage of every amount bet in that game contributes to the progressive jackpot. The jackpot total updates approximately every 15 seconds.

## Linked Progressive Jackpot e-Instant

### **What is a linked progressive jackpot game?**

Linked progressive jackpot e-Instant games feature more than one progressive game contributing to a jackpot. A percentage of each bet made from any game in the series contributes to one shared jackpot. With each purchase made on any contributing game, the jackpot grows until won through playing one of the contributing games. Linked progressive jackpot games often feature larger shared jackpot values since more than one game contributes to the increasing jackpot.

### **When I play a linked progressive game, how will I know I win the jackpot?**

If you win the jackpot, you will see a popup immediately after the PLAY button is selected letting you know you have won the jackpot and the amount you won. If there is no jackpot win, the main game will play through and the jackpot amount will increase incrementally with each game played.

### **What happens after the linked progressive jackpot is won?**

Immediately after the jackpot is won, the winning player will see a popup on the screen indicating they won the jackpot with the amount shown.

All other players currently in the games that contribute to the linked progressive jackpot will see a message on the jackpot banner at the top of the screen informing them the jackpot was just won. The jackpot amount will reset to \$10,000. The jackpot will grow from \$10,000 until it is won again.

### **When playing a linked progressive game, are the chances of winning the jackpot higher if my bet is larger?**

Yes. When a bet is placed, the number of chances for the linked progressive jackpot to be hit is based on the total amount of the bet. Every cent that is bet equals one chance to win. If the bet is \$1, then there are 100 chances of hitting the jackpot. If the bet is \$2, then there are 200 chances to win, and so on. The odds for winning the jackpot are listed in the game's help pages.

### **Do other players playing the games that contribute to the linked progressive jackpot affect my chances to win the jackpot?**

No. The amount of your bet determines the number of chances you have to win the linked progressive jackpot. Nothing another player does in any of the linked progressive games will affect the number of chances you have to win the jackpot.
